The World Comes to OTC

OTC is considered by many in the global energy industry to be ‘the place’ to hear about global developments and activities.

OTC attracts the biggest names in energy. World leaders, royalty, CEOs, and US elected officials attend OTC to make critical decisions and share ideas to meet global demands.

The result is the opportunity for companies to develop business relationships and tap into emerging regions that are vital to offshore development. Even those who are new to the marketplace have seen that by participating in OTC, they obtain recognition necessary for their growth and visibility to thousands of industry professionals.

"OTC is a good display of the overall industry progression through the year.”
